

**Verita
Release Notes**

The Saspac Mark Book has been rebranded and is now called Verita.

Version 20.07.26

1. You can only have access to the Mark Book if the latest Mark Book structure has been imported from SA-SAMS.
2. Functions: Cycle Not Assessed:

This function will facilitate entering marks for tasks that were not assessed during the COVID-19 pandemic.

- a. This new function is only available to Master Users.
- b. All grades and subjects will be processed.
- c. The function will add a mark of -1 to every task and subtask that has no existing mark for the selected cycle. All necessary copied tasks and totals will be calculated.

**Saspac Web
Release Notes
V20.02.08**

SASPAC ERP V20.07.31 must be installed

Mark Books: Export:

1. When selecting "Include Collated Cycles": if there are no tasks for the subject, the error "Actual value was -1." has been fixed. In this case only the subject totals for each term will show.

Mark Books: Re-Calculate Marks:

1. If a subject has no tasks for any cycle, the subject totals will not be calculated for that cycle. This will stop a -1 from being erroneously inserted.
The automatic consolidation will still be run.

Mark Books: Capture:

1. When you choose to view the SBA Year Mark, 2 columns will be shown in the grid. The 1st will be the current column. The 2nd will show the SBA Year Mark in decimals, rounded to the 4th decimal place.

Mark Books: Capture:

1. When saving, if an Effort Symbol is invalid, the error message will show correctly. The screen will not be saved or refreshed.
2. When you choose to view Effort Symbols, there is a new button at the top of the screen: View Effort Symbols. This will show the list of valid effort symbols for the current subject.

Mark Books: Capture:

1. For Exception Subjects: Cycle 4 is the combination of the 4th term and the SBA marks. When calculating totals for this cycle, the weight used is now the modified weight as entered on **Saspac ERP**. (Please see the Saspac ERP release notes for further information.)

Tasks: View:

1. A new column, Exception Weight, has been added.
This will only show a value for Exception subject where a task from the 4th term has an exception weight.

Tasks: Edit:

1. A new column, Exception Weight, has been added. This will display the modified weight for Exception Subjects.
